

# Sample LinkedIn Profile

## Summary

I have expertise in automating Cloud deployments and implementing Landing Zones using CI/CD methodologies. My experience includes assessing Cloud Solution Designs to onboard new workloads onto the Azure Platform.

I've successfully contributed to Azure DevOps projects and Landing Zone CI/CD implementations. Additionally, I've developed custom solutions, including Azure APIM API creation and deletion based on OpenAI Swagger files, automated resource deployments, Azure Policy enforcement, and secret rotation. These solutions leverage Azure-native cloud services, REST APIs, YAML Pipelines, Git, Azure APIM, Logic Apps, Function Apps, Azure PowerShell, and CLI.
