# Eliza Zadura

Full stack developer  
Greater Malmö Metropolitan Area

## Summary

Full-stack developer focused on back-end and systems design.  
Recent work in Java / Spring and database-driven applications, with interest in distributed systems and integration patterns.  
I'm drawn to how software development is evolving with automation and AI - how to work with that shift rather than resist it.  
I care about pragmatic design and the chain from problem - solution - technology.

## Experience
