Jason Godbold-Smith

Lead Consultant at Dynatrace
United Kingdom

Summary

Solution & Technical Architecture.

IT Security technologies: SSO, TLS, digital certificates, encryption/ hashing and application hardening.

Infrastructure: designing scalable and high-availability systems.

Understanding of software stacks for solution design. Private circuit P2P networks (VPN and leased line connectivity).

Experience with Business Continuity; SLAs and compliance standards.

Secure SDLC and an understanding of penetration testing (static/ dynamic/manual)

o Using vendors Veracode and Synopsys in software development/ delivery (including OWASP/SANS compliance).

Architecture patterns: SOA (SOAP styles, RESTful), CQRS.

Apache web Server (HTTPD)

Extensive Java development experience, covering:

o Java SE

o Maven

o Netbeans IDE (& RCP development)

o Eclipse IDE

o Software installation tools (izPack /InstallShield)

o Code quality, versioning and automation tooling

Continuous Integration experience.

Atlassian product set.

Dynatrace.

Experience with, internalisation/localisation of products.

Experience with the development and delivery of software products across heterogeneous environments: Windows, Linux, Internet browsers and DBs (SQL Server/Oracle).

Experience

Dynatrace

Lead Consultant

May 2021 - Present (4 years 11 months)

Executive Summary

High-impact Observability Lead dedicated to ensuring enterprise customers realize the maximum ROI from the Dynatrace platform; through actioning Operation Efficiency, Software Delivery, Digital Experience; Security and Culture.

1. Strategic Advisory & Transformation

- Transformation Journeys: Partner with leads/owners to define observability roadmaps that align with business transformation goals (e.g., Cloud Migration, Monolith-to-Microservices).
- SLI/SLO Frameworks: Lead workshops to identify critical user journeys and define Service Level Indicators (SLIs) and Service Level Objectives (SLOs) that reflect true customer experience.

2. Advanced Technical Implementation

- Advanced Analytics (DQL): Write complex data queries using Dynatrace Query Language (DQL).
- OpenTelemetry (OTel) Orchestration: Design vendor-neutral instrumentation strategies using OpenTelemetry, ensuring seamless integration between OTel collectors and the Dynatrace platform.
- Cloud-Native Observability: Oversee the monitoring of large-scale Kubernetes/OpenShift estates, ensuring full-stack visibility from cluster to container level.
- Hyper-scaler monitoring: monitoring a variety of SaaS services across the main 3 hyper-scalers.
- Hybrid Management: Manage the technical lifecycle and consolidation of Dynatrace Managed (on-prem) and SaaS tenants, ensuring data integrity and cost-optimized licensing.
- Design deployments of Dynatrace components to reflect hybrid deployment models, and fulfil technical requirements.

Experian

Senior Technical Consultant

March 2014 - May 2021 (7 years 3 months)

United Kingdom

Technical Lead

- Leading client and internal technical workshops to produce solution architecture and systems integration design documentation covering: infrastructure, operating system, databases, security and system interfaces.
- Communicating with technical peers and the ability to liaise with generalists in layman's terms.
- Experience with migrating client solutions to Experian's private cloud (as a Managed Service) and vice-versa, from Experian's cloud.
- Lead compliance assessments covering security and non-functional requirements.
- Documenting requirements and technical specifications for bespoke product development.

Engaging with local and global Product Management functions to report on product improvement opportunities based on delivery best practice and client feedback.

Pre-Sales

- Presenting technical pre-sales information to prospective clients and supporting business/sales teams in project bids.
- Input into bid proposals covering delivery effort and Experian Managed Services costs, for integration into Experian's data centre plus RFIs / RFPs.
- Working on Proof of Concepts to better understand unique propositions or delivery configurations.

Experian

10 years

Technical Project Management/Line Manager

2010 - March 2012 (2 years)

United Kingdom

Technical Project Manager

- o Project Manager on multiple/concurrent internal software development projects for release to regional delivery centres.
- o Communicating upwards (to senior management) and fellow developers/QA/technical authors/Product Managers.
- o Identifying risks and finding mitigations (escalation to management when unsuccessful).

- o Leading project resources, from multiple disciplines across multi-off-shore locations.
- o Chairing meetings with various stakeholders across the business.
- o Identifying and managing cross dependencies within the project and programme.
- o Creating & owning project documents: status reports; change requests and end of project reports.
- o Lead project planning, including: schedule / capacity planning and setting milestones.
- o Experience of integrated project management using Prince and Agile software development methodologies.
- o Working with Continuous Integration build tools and understanding the processes for moving from development to releasable software.
- o Identifying best practices and addressing inefficiencies within the project.

Line Manager of software developers

- o Coaching and mentoring members of the development team, in their career development.
- o Conducting mid/end of year reviews.
- o Create and provide input into my own direct reports objectives and others within the team/project.
- o Identify areas for learning and commend good pieces of work.
- o Provide input on team calibrations meetings.

Agile Scrum Master

2010 - 2012 (2 years)

United Kingdom

Scrum Master of a team on a replatforming programme, consisting of developers/QA across different geographic locations.

- o Organised and facilitated daily stand-up meetings, reviews, retrospectives, sprint and release planning, demos and other Scrum-related meetings.
- o Created technical specifications that are understandable by developers to capture tasks required for development.
- o Demonstrated new software functionality to stakeholders.
- o Tracked and communicated team velocity and sprint/release progress.
- o Ensured the development team were practicing the core agile principles of collaboration, prioritisation, team accountability and visibility.
- o Participated proactively in developing and maintaining team standards, tools and best practices.
- o Identified and remove impediments to prevent distractions.

- o Rolled-out of tasks across multiple development centres.

Java Developer

2005 - 2010 (5 years)

United Kingdom

- Worked on high-level requirements from Product Management, decomposing work and reviewing with other senior developers and QA.
- Provided development estimates to team leads and reviewed technical designs.
- Lead demonstrations of software functionality created and provided input into release documentation.
- Documented testing performed, reviewed with QA and provided input on additional testing required.

Technical Support Analyst

2002 - 2005 (3 years)

United Kingdom

- o Provided support to clients (internal/external) across the globe on Experian's business rules and reporting products.
- o Triaged issues raised by clients and providing support: identifying workarounds and creating patches for the software.
- o Escalating issues to Software Development/Product Management, where impact was large and required additional technical input

NES UK HOLDINGS LIMITED

Java Developer

2001 - 2002 (1 year)

Milton Keynes, United Kingdom

I worked as developer on various products in Visual Basic and MS Access, which involved adding new features, fixing bugs and creating installation packages.

ALLIED DUNBAR FINANCIAL SERVICES LIMITED

Software Developer

1999 - 2000 (1 year)

Swindon, United Kingdom

I worked as a developer on a Sales Performance data warehouse.

Education

Coventry University
