Top Skills

Engineering
Ai model
FastAPI

Languages

Hindi (Native or Bilingual)
English (Full Professional)

Certifications

Programming Foundations with
JavaScript, HTML and CSS

Pranav Rai

AI Engineer || Web & Mobile App Developer || Freelancer || Quzy
Creator || Turning Ideas Into Real Tech Products || HBTU '22
India

Summary

I like building things that make sense.

I'm a software engineer who loves turning ideas into real, usable products fast. Whether it's a web platform, a mobile app, or something powered by AI models like OpenAI or Gemini, I enjoy creating tools that feel intuitive and actually solve problems.

I've done a lot of hands-on work with AI techs, and along the way, I've developed strong prompt engineering skills tuning models to respond accurately, adapt to context, and feel natural in real use cases.

My core strengths lie in full-stack JavaScript, especially React, React Native, Node.js, and integrating smart tech like AI APIs, WebSockets, and cloud-native systems. I've worked across different architectures from scalable backends to real-time mobile interfaces.

I learn fast, adapt quickly, and always stay curious. I care about writing clean code, designing with clarity, and shipping things that matter.

Always exploring. Always building.

Experience

Unicorn Labs

Senior Software Development Engineer
September 2025 - Present (10 months)
India

MetaMix Tech

Software Engineer
November 2022 - August 2025 (2 years 10 months)

Delhi, India

Built backend for Medvisor, handling 3D patient model storage and retrieval and patient data management including encryptions

Developed web and mobile apps for Future EV bike rental platform with admin dashboards for business houses.

Deployed Kubernetes microservices with Docker, ArgoCD, and GitOps.

Delivered scalable systems across backend, cloud, and real-time data flows.

Freelance

Freelance Software & AI Product Developer

March 2022 - July 2025 (3 years 5 months)

Helped startups and clients turn ideas into real, user-ready web and mobile apps

Built custom solutions using React, React Native, Node.js, Supabase, and AI APIs

Specialized in prompt engineering and AI wrappers to automate tasks and improve UX

Delivered projects across SaaS platforms, mobile apps, dashboards, and database systems

Focused on clean architecture, scalable backend design, and fast cloud deployments

Education

Harcourt Butler Technical University

Bachelor of Technology - BTech · (August 2018 - June 2022)
