Belarusian state University , Minsk

September 2021 – July 2025

Mathematics and IT, graduated.

About me

I’m looking for an opportunity to get back into development, because one year in the army was a huge pause. I have experience working in a team. I speak English at the B2 level and am actively striving to improve my skills in this area. I also have experience working with technologies such as Git, Flutter, Golang, Android and iOS, and Machine Learning, which I acquired while studying at various university courses. I like to master new knowledge, which contributes to my development both in my studies and in my professional activities. I studied Golang and backend technologies myself with the help of free courses and YouTube. Also I have skills to work with AI Agents, Prompt and Context Engineering and i know how to build AI automations in n8n.
